*Certified to SAE J1349. F-350 DRW/F-450/F-550 weights shown are for 141” wheelbase Regular Cab, 162” wheelbase SuperCab or 176” wheelbase Crew Cab models. For 165”, 186”, 189”, 200”, and 201” wheelbase models, weights may be somewhat less (usually not more than 200 lbs., or 400 lbs. with 201” wheelbase). *Requires optional High-Capacity Trailer Tow Package.

Load rating represents maximum allowable weight of people, cargo and body equipment and is reduced by the weight of optional equipment.

**5th-Wheel Towing Notes:** Trailer weights shown assume 875 lbs.-1,000 lbs. second-unit body weight. Be sure combined weight of vehicle and trailer does not exceed listed GCWR. Trailer kingpin weight should be 15–25% of total loaded trailer weight. Make sure that the vehicle payload (reduced by option weight) will accommodate trailer kingpin weight and the weight of passengers and cargo added to the towing vehicle. The addition of trailer kingpin weight, and the weight of passengers and cargo, cannot cause vehicle weights to exceed the rear GAWR (Gross Axle Weight Rating) or GVWR (Gross Vehicle Weight Rating). These ratings can be found on the vehicle’s Safety Compliance Certification Label. See your Ford Dealer for conventional trailer weights.
