KICK-START YOUR ADVENTURES. With up to 1,926 litres (68.0 cu. ft.) of cargo space with the rear seat folded, Escape is your perfect partner for spur-of-the-moment adventuring. And accessing that space is easy thanks to its foot-activated hands-free power liftgate. With your arms full and your Intelligent Access key in a pocket or purse, just kick your foot under the bumper and the liftgate automatically opens or closes. You can even program the fully opened height to the position that works best for you.

VENTURE OUT WITH CONFIDENCE.

NEW Adaptive Cruise Control
Helps maintain your choice of speed and preset gaps from the vehicle in front of you. It can also alert you to a potential collision. If one is detected, adaptive cruise control and collision warning with brake support1 flashes a warning via heads-up display on the windshield, sounds an alarm, and can pre-charge the brake system to provide full responsiveness when you do brake.

NEW Lane-Keeping System
Helps maintain your lane by using a forward-facing camera to detect lane markings, and can apply torque to the steering wheel if it senses your vehicle drifting unintentionally out of its lane. If needed, the system can also send gentle vibration pulses to the wheel to prompt you to steer back toward centre. If it detects you’ve come too close to – or crossed – the markers multiple times, a Driver Alert System1 displays a coffee cup icon to suggest taking a break from driving.

BLIS (Blind Spot Information System)
Alerts you with a light in either sideview mirror3 if its radar sensors detect a vehicle in the corresponding blind spot. Cross-traffic alert, part of the system, notifies you with a beep and a warning light in your sideview mirror if it detects a vehicle approaching either side as you slowly back Escape out of a parking space. Either way, BLIS® with cross-traffic alert helps keep you aware of things that may be just out of your line of sight.

Driver assist features are supplemental and do not replace the driver's attention, judgment and need to control the vehicle.

1 Available feature. 2 Lane-Keeping System does not control steering. 3 BLIS replaces standard integrated blind spot mirrors.
DON’T LET PARKING SLOW YOU DOWN.

In an Escape Titanium equipped with the Technology Package, carefree parking is right up your alley. Or street. Or parking garage. Thanks to the ultrasonic sensors and other advanced features of its Enhanced Active Park Assist System, parking reveals further talents of the new Escape. Whether looking for a perpendicular spot to back into, or parallel parking, the system not only helps you find a suitable one, it steers the vehicle into place while you control the gear shifter, brake and accelerator pedals. The system also provides steering assistance when pulling out of a parallel parking space. So go ahead. Find your spot. You’ll be parked and on your way in no time at all.
SE in Ingot Silver Metallic with available equipment. 1 Horsepower and torque ratings achieved with 93-octane fuel. 2 Available feature. 3 Requires 2.0L EcoBoost® engine. 4 When properly equipped.

Remember that even advanced technology cannot overcome the laws of physics. It’s always possible to lose control of a vehicle due to inappropriate driver input for the conditions.

PURSUE YOUR PASSIONS. When you want to escape, getting to your destination is half the fun. When equipped with the 245-hp 2.0L EcoBoost® engine1 and Class II Trailer Tow Prep Package,2 Escape SE and Titanium models provide the power and capability to tow up to 3,500 lbs. (1,588 kg)4 of ATVs, dirt bikes or snowmobiles. And with trailer sway control5 monitoring vehicle motions to detect trailer sway, do it with confidence, too. To help you maintain control of both your Escape and the trailer, the system can reduce engine speed and selectively apply the brakes if needed. Just one more way Escape helps you handle what the day may bring.
ESCAPE WITH AUTHORITY.

With sure-footed standard FWD or the enhanced grip of Intelligent 4WD, Escape instills confidence in various road and weather conditions. With Intelligent 4WD, the system assesses those conditions about 20 times faster than the blink of an eye, readjusting as needed to deliver the right balance of handling and traction. Whether challenges include snow-packed roads, loose gravel, or even a sudden downpour, this on-demand 4WD system can help you keep your adventures on track.

Maintain your peace of mind with standard features like 7 airbags, and AdvanceTrac® with RSC® (Roll Stability Control™). Enhancing vehicle stability in a range of conditions, the system selectively applies individual brakes and modifies engine power to help keep all 4 wheels firmly planted.

1 Available feature. 2 Remember that even advanced technology cannot overcome the laws of physics. It’s always possible to lose control of a vehicle due to inappropriate driver input for the conditions.
